AKSHAY KUMAR

Network Engineer | Network Support & Security Fundamentals

New Delhi, NCR (Open to Noida / Gurugram) • +91 7549645076 • akshaykumarstm2020@gmail.com • linkedin.com/in/akshay-kumar

PROFESSIONAL SUMMARY

Network Engineer with hands-on experience in network support, covering IP configuration, subnetting, LAN/WAN connectivity, and VPN access for up to 50 end users. Skilled in network troubleshooting, switch and router configuration (Cisco Packet Tracer), and Windows/Linux system support, with ticket-based incident handling, escalation, and documentation. Building network security fundamentals through ongoing Advanced Cyber Security training at CRAW Security. Strong communicator in English with a customer-first approach.

KEY SKILLS

- **Networking:** LAN/WAN, TCP/IP, IP Configuration & Subnetting, VPN Access, Switches & Routers (Cisco Packet Tracer), Network Troubleshooting, Connectivity Diagnostics
- **Network Security Fundamentals:** Advanced Cyber Security training (in progress), Patch & Update Management, User/Account Access Management
- **Systems & OS:** Windows, Linux (File Management, User & Group Management, Basic Command-Line Operations), System Configuration
- **Virtualization:** VMware (VM Setup & Configuration)
- **Incident & Ticket Management:** Incident Logging & Escalation, SLA-Based Resolution, Remote Troubleshooting, MSG91 (hands-on)
- **Desktop & Hardware Support:** Hardware & Software Installation and Configuration, Desktop/Laptop/Printer Troubleshooting, Windows Data Recovery
- **Tools:** Zoom, AnyDesk, UltraViewer, Microsoft 365 & Outlook

PROFESSIONAL EXPERIENCE

Network Engineer (Network Support) **April 2026 - Present**
Tech Guru IT Solutions, New Delhi

- Provide network support as the first point of contact for up to 50 end users, configuring and troubleshooting IP settings, VPN access, and LAN/WAN connectivity to maintain reliable network access for staff.
- Diagnose and resolve network, hardware, software, and printer issues, resolving 10-20 tickets per day while maintaining clear, courteous communication with users.
- Log, track, and resolve incidents end-to-end through the MSG91 ticketing system, following documented SLA and escalation processes to route complex network issues to senior and specialist teams.
- Carry out patch and update management and Windows system configuration to keep systems stable and up to date.
- Set up and configure virtual machines using VMware to support testing and system configuration needs.
- Follow up with users after escalation to confirm full resolution and satisfaction.
- Document issue resolutions and network/system configurations in a shared knowledge base, and maintain logs and records to reduce turnaround time on recurring issues.
