PROFESSIONAL SUMMARY

Freelance Web Developer and Network Engineer building responsive business websites, booking platforms and dashboards. Hands-on experience in deployment, network troubleshooting, Windows/Linux support and ticket-based incident resolution.

KEY SKILLS

Web: HTML, CSS, JavaScript, Python, Django, Flask, PHP, Laravel, MySQL, Git/GitHub.

Infrastructure: LAN/WAN, TCP/IP, subnetting, VPN, Cisco Packet Tracer, Windows, Linux, VMware.

Support: MSG91 ticketing, incident escalation, patch management, remote and hardware troubleshooting.

PROFESSIONAL EXPERIENCE

Freelance Web Developer

Independent | Business websites & web applications | Project-based

- Build responsive business websites, service catalogues, booking workflows and management dashboards, including NextGen, Sukoon and Khushi projects.
- Manage website deployment, domain setup, troubleshooting and ongoing content updates.

Network Engineer (Network Support)

Tech Guru IT Solutions, New Delhi | April 2026 - Present

- Support up to 50 end users across IP configuration, VPN and LAN/WAN connectivity; resolve 10-20 network, hardware and software tickets daily.
- Track incidents through MSG91; handle escalation, patching, Windows/VMware configuration and resolution documentation.

SELECTED PROJECTS

NextGen Lapy World

Business website | Repair booking, tracking & device catalogue

- Built a device repair website with service discovery, repair booking and tracking IDs, a laptop catalogue and WhatsApp contact pathways.

Live website: nextgenlapyworld.in

Sukoon Wellness & Spa

Booking & operations platform | Laravel, PHP, MySQL

- Built booking and staff allocation workflows with double-booking protection, role-based dashboards, billing, CRM, inventory and reports.

Live website: sukoonwellnessandspa.in

Khushi Decoration & Seasonal Store

Responsive business showcase | HTML, CSS, JavaScript

- Built a responsive shop showcase with category filters, photo galleries, an event catalogue and interactive shop map; deployed on GitHub Pages.

Live website | GitHub repository
