PROFESSIONAL SUMMARY

Freelance Web Developer and Network Engineer with hands-on experience building responsive business websites and supporting networks, Windows/Linux systems and end users. Develops service catalogues, booking workflows and management dashboards, with deployment and troubleshooting experience. Skilled in IP configuration, subnetting, LAN/WAN connectivity, VPN access and ticket-based incident handling, with a customer-first approach.

KEY SKILLS

Web development: HTML, CSS, JavaScript, Python, Django, Flask, PHP, Laravel, MySQL, Git/GitHub; responsive websites and deployment.

Networking: LAN/WAN, TCP/IP, IP configuration, subnetting, VPN access, Cisco Packet Tracer, network troubleshooting and connectivity diagnostics.

Systems & security: Windows, Linux, user/account access, patch management, VMware, network security fundamentals.

Support & tools: MSG91 ticketing, incident logging and escalation, SLA-based resolution, desktop/laptop/printer diagnostics, AnyDesk, UltraViewer, Microsoft 365 and Outlook.

PROFESSIONAL EXPERIENCE

Freelance Web Developer

Independent | Business websites & web applications | Project-based

- Build responsive business websites and web applications, including NextGen Lapy World, Sukoon Wellness & Spa and Khushi Decoration.
- Develop service catalogues, booking workflows, contact pages and management dashboards based on project requirements.
- Handle website deployment, domain setup, troubleshooting and ongoing content updates.

Network Engineer (Network Support)

Tech Guru IT Solutions, New Delhi | April 2026 - Present

- Provide first-line network support for up to 50 end users, configuring and troubleshooting IP settings, VPN access and LAN/WAN connectivity.
- Diagnose network, hardware, software and printer issues; resolve 10-20 support tickets per day with clear user communication.
- Log, track and resolve incidents through MSG91, following documented SLA and escalation processes for complex issues.
- Carry out patch/update management and Windows system configuration; configure VMware virtual machines for testing and system setup.
- Document resolutions and configurations in a shared knowledge base; follow up after escalation to confirm resolution and user satisfaction.

Selected projects, education & certifications

SELECTED PROJECTS

NextGen Lapy World

Business website | Repair booking, tracking & device catalogue

- Built a customer-facing website for a device repair business in Nehru Place, with device-specific service discovery and repair booking.
- Added repair tracking using a tracking ID, a laptop catalogue and WhatsApp contact pathways.

Live website: nextgenlapyworld.in

Sukoon Wellness & Spa

Booking & operations platform | Laravel, PHP, MySQL

- Developed booking workflows, staff allocation with double-booking protection, staff dashboards and role-based access.
- Built business management features covering services, rooms, bookings and payments, with CRM, billing, inventory and reporting workflows.

Live website: sukoonwellnessandspa.in

Khushi Decoration & Seasonal Store

Responsive business showcase | HTML, CSS, JavaScript

- Built a responsive showcase for a business in Dema, Bihar, featuring decoration collections, bouquets, gifts and wedding car decoration.
- Implemented category filters, photo galleries, a photo viewer, an event catalogue and an interactive shop map; published with GitHub Pages.
